

Pictures of the Waterslager

*Photo's by Ella Galik
used by permission*

Waterslager youngsters about 14 days old.

Notice the fresh fruit and broccoli offered.

Young Waterslagers enjoying their Lucite swing and gathering on a nearby perch.

Giving your Waterslagers a variety of perches keeps them active and allows for exercise.

Notice the clothes pins used as perches. This gives an individual bird a place to retreat for privacy.

Changing the paper daily allows for a clean and sanitary environment.
