

## *Richard Rolloff's Bird Room*

Richard's bird room is located in Oregon.

His 7' x 15' aviary has two 3' x 7' flights at each end where the small windows are located.

Richard devotes about 45 sq ft for breeding and 42 sq ft for his flight cages.

Richard has been breeding canaries for 30 years and waterslagers for 8 years. Notice this large perch is a ferris wheel. It will rotate when the canaries land on it. This is one of his 3' x 7' flights.

Richard uses "[Quality Cage Co.](#)" brand cages. He raises about 60 birds from 10 hens and 3 males. He has 15 breeding cages.
